

Attendance

- Saul Cardona - marketing direction
- Matthew Jones - secretary-treasurer
- Ehren Collins - senior tech direction
- Sam White - junior tech direction
- Leo Leider - logistics direction
- Rory Brennan-Jones - president
- Jacob "Hat Jacob" Greenberg - tech person

Previous events

- CIFsgiving
 - Very successful
 - Turkey was well made
 - 15 people attended
 - Matt Jones is still assigning participation points to the participants
 - Matt Jones is also reimbursing the expenses paid by our board members
 - What could be improved:
 - We could have enforced the "bring food" rule better
 - We could have defended Tim's strawberry rhubarb pie better (it was stolen while we weren't looking; we have suspicions about who did it, but let's not point fingers in the CIF historical records)

Upcoming events

- Don't Freeze
 - Dec 5
 - S'mores night
 - Last event of the semester
 - We will make it a private (non-public) event in CCC (if it's public, sorority girls would come to raid)
 - Possible collab with AIF (oh yay it's officially happening)
 - We need to reserve the fireplace
 - Fire permit request phone #: 585 275-3243
- Dec 7: final board meeting and final floor meeting
- 1 board meeting during Winter break

Tech updates

- Jacob and Sam have been working on a new website (zeta.cif: [Computer Interest Floor](http://zeta.cif.computerinterestfloor.com))

Resignations and emergency elections

- Rory is resigning
 - Should happen after Dec 7 (final board meeting and final floor meeting that day)
- Emergency elections will happen next semester at the very beginning (1 week after the start of the semester)
- Ehren and Sam do not have to resign in order to reshuffle
- Saul is also resigning
 - He will be studying abroad in Japan (yay!)
- Potential new replacement board members
 - Hat
 - Kenneth
 - Ji Ling (he has a difficult work schedule, but we can change board meeting times to make it work)
 - Tim
 - Elijah

Minecraft server idea

- Ehren has emailed many different organizations to ask if they want Minecraft servers
 - Pokemon club already responded and said yes
 - URSGA will respond
- The servers that we would set up would be local, but Ehren has contacted IT to explore the possibility of making these servers public (opening port 25565).
- Glory to CentOS

Tech Check Newsletter†

- Announcements
 - N/A
- Upcoming events
 - Open lab
- Past events image & description
 - AI Essentials tech seminar
- Review sessions
 - N/A (idea for next semester)
- Contact
 - Usual contact info

Interview with potential member

- It will happen tomorrow at 5pm

Hex code for CIF green

- #297E46
