

Attendance

- Saul Cardona
- Rory Brennan-Jones
- Sam White
- Leo Leider
- Matt Jones (late)
- Ehren Collins (late)
- Jacob “Hat Jacob” Greenberg

Tech

- CIF’s network is strangely designed
- If Crucible shuts down, our network does, too
- There is a switch we can’t access called Ben (Ben is not the real Ben)
- Ben is acting as a router and serves as an access point for the lab
- No one knows exactly what servers are doing what
- Previously, there was an emergency repair in which Ben was replaced with Fast Ben, but the emergency repair was A) never documented and B) never replaced with a permanent repair

Past events

- VGDC collab
 - Success
 - Fun
 - We would’ve liked it if more non-board-CIF-members showed up, but we predicted this
 - The reservation request (which was made a month ago) is still marked as pending/open, but that didn’t interfere with our ability to see the room (no one kicked us out)

Madison questions / SIH weekend

- It’s going to happen sometime between the 17th and 21st
- Reslife will provide us with cookies to give to people
- Locations
 - Some place in the engineering quad
 - Somewhere in the library
- Locations we don’t like
 - Wilson porch (it’s too cold)
 - Hirst lounge (people are programmed to ignore it)
 - Sue B (people are also programmed to ignore it)
- Idea: bring alienware

- Idea: keep emails of everyone who stops by who expresses interest in a tour of CIF, and then reach out to them to arrange a time
- We only need 2 to 3 people to table
- We should see when Winter is available
- Day: Wednesday or Friday
- Time: Wednesday: after 5pm, Friday: after 9am
- Location: Sue B or Wilson

Appointed Positions

- Joshua Schiavi gets 2 points for social media
- Hat Jacob gets 3 points for his tech work in the CIF lab

Dandyhacks

- Dandyhacks is using us for advertising and they are stressed because they are promoting their event too soon
- 1 person should be at Dandyhacks Saturday so that they can monitor a CIF Wii present at the event
- We will put out an announcement that advertises Dandyhacks, but includes a call for the formation of 1 or more CIF teams
- Ehren will ask if CIF can bring advertising material to Dandyhacks (e.g. CIF table cloth on the Wii table)

Tech seminar

- It's the same day as Dandyhacks
 - We have decided to keep it anyway
 - We probably will not fold it into Dandyhacks since "AI Essentials" isn't suitable material for a tech workshop
- 2pm-3pm, Genesee 325

Simcon

- The theme will be "Haunted"
 - Idea: CIF could bring its Halloween decorations
- Idea: CIF hosts a LAN event (e.g. in a previous SIMCON, JA hosted a Minecraft event that was part of the URSGA schedule)
 - Idea: LAN multiplayer horror game
- SIMCON registration ends Feb 27

Participation

- Ji Ling has few points because of his weekend job
- Erman will receive a participation point for the helping with the VGDC collab

CIFsgiving

- Location: Anderson 3
- We need to buy a turkey
- Tristan likely will not be cooking the turkey this year (he's bringing KNIVES this year)
 - We will contact him to ask him to make the turkey, which will help with participation point requirement
-
