

Computer Interest Floor

Board Meeting!
August 30th, 2026
Anderson 310

- Attendance
 - Ehren
 - Sam
 - Matt
 - Tim
 - Leo
 - Stephen
 - Lucas D
 - Donald
 - Hieu
 - Hat Jacob (But I don't have participation points anymore) : (
- SIH Officer Training Debrief and discussion
 - Everyone relevant went.
 - It sure was an officer training.
 - Standard business
 - All public events should be in CCC
 - We should be doing this anyways. It's a little more work, but it does help us.
 - They want us to fill out a form after each event is completed with attendance data and reimbursement info.
 - This is slightly annoying. : (
 - Business Manager stuffs
 - Spreadsheets.
 - It's pretty standard, to be honest.
 - It's time for the Acronyms!!!
 - There were so many...
 - The grad student SIH person is very enthusiastic.
 - Ehren is meeting with him on Tuesday.
 - There may be a whole board meeting with him later on down the line.
 - President council meetings will be happening later,
 - These will be scheduled this week.
 - Sam, Matt, Stephen, & Ehren are all fire trained now!
- IT/CIF Help Desk Thingey down the line?
- Past Events
 - Minecraft Mayhem retrospective
 - What went well?

- Engagement - everyone seemed really engaged, at least enough to want the server to stay up
 - Given the circumstances, it was nice!
 - Around 35 people showed up!
 - And, they were pretty engaged.
 - Feedback time!
 - People liked it a lot, actually. Pretty much all the feedback was positive.
 - People who filled out the feedback form:
 - dgrezda@u.rochester.edu
 - vnguy34@u.Rochester.edu
 - sgingric@u.rochester.edu
 - xujenny245@gmail.com
 - mharp13@u.rochester.edu
 - We got a few people in the Discord, which is pretty fun.
 - What didn't (and was in our control)
 - CIF Public Enemy Number 1
 - The river level room was "double booked" with the Hillel Sabbath Dinner
 - This really didn't affect anything, but alas.
 - The Interfaith chapel also closed at 11, when we were told at midnight, so the event had to end early.
 - Matt/Orientation *tried* to fix this at 10-11, but alas.
 - So, we had to tell people at 10, and told people it wasn't our fault.
 - Permanent public Minecraft server?
 - The server is still up. We can keep it going for a while.
 - We'll transfer it over to another computer later, so we can use the biggun for other things.
- Future Events
 - Activity Fair
 - People are available, it's soon. 3-5 on Friday.
 - Poster will be done soon.
 - Ice Cream Social
 - This will be the day after the activity fair.
 - It starts at 6:30, in Friel.
 - For Real, for real.
 - I (me) has a car, so we can get ice cream for the event with ease.
 - **FOR TIM**, 16:9 for this for digital signage.
 - Freshman Gaming
 - The 12th, is the first one, in the eveningtime.
 - Location?
 - We don't have a space yet, since Friel is closed.

- Leo is going through the first year hill office
 - Worst case, we claim a lounge in one of the first year buildings.
- Linux Tech Seminar (Ferguson blessed us)
 - Location and time is set
 - Genesee 325 is confirmed, at the time we want, which is cool.
 - I know its annoying but we should be putting all events in CCC
 - Sam is working on it, but it will probably be different from what it has been in the past (To put more of an emphasis on GUI and switching to Linux)
- We need to schedule the off-campus event. Skating? Laser Tag?
 - Ice Skating is right by (The Genesee Valley Skating Rink)
 - 3 Dollars w/ ID, plus 3 Dollars for Skate Rentals.
 - So, \$6 per person, which can be covered pretty easily.
 - We can also go downtown to to the Holiday Market (Which is free), if the Skating rink goes well.
 - It's very cutesy. :)
- Board Game night.
 - 26th, in the eveningtime.
- Floor Meeting
 - 9 PM on the 6th is the first.
 - This is one week from today.
 - They will be every other week at 9:30 PM.
- Finalize CIFsGiving date and time
 - November 21st, 2026.
 - We *will* be having a turkey this year!
 - I have a Costco membership, plus Matt's Mother has a BJ's membership, so getting a turkey is not an issue.
 - Possible advancement relations email?
- Video game nights.
 - Get Pizzas on occasion
 - We'll discuss from where later
 - Matt says no Salvatores, though
- Don't Freeze.
 - Mmmm Fire.
 - The LAST DAY you can do this is the 14th of December.
 - Let's Plan for Friday, December 11th, at 8 PM.
- Maybe another fire event prior to Don't Freeze?
 - We're running out of Weekends, but can do it on a weekday?
 - I think this is being tabled for another
- A review of all the events that we planned occurred. You can check the calendar, or the meeting minutes of the meeting immediately prior to this one.
 - It looks good, so that's fun.
- Ferguson will be E-Mailed about advertisements and stuff later on, as with most other CS professors.
- Collabs

- Baja
 - Baja suggested some community outreach but are open to anything
 - This could be pretty interesting.
 - Ehren will ask more questions, and see what we can do.
- MIF
 - We talked to Mr. MIF about hosting some sort of collab.
 - Maybe playing video game music?
 - We talked about this last year, but it didn't go anywhere.
- CSUG
 - CSUG had no ideas
 - Ahh, CSUG
 - Small hackathon?
 - Too much work?
 - CIF vs CSUG?
 - Game Jam
 - This could be pretty fun.
 - We could bring in Art/music people if we want to, but this may be too complicated.
 - Get Video Game Dev Club involved?
 - Get Professor Lopocaro involved.
 - We'll write up a proposal to Danica/CSUG to see if they like us.
- A Fire Alarm went off?
 - People here have Post Anderson Stress Disorder.
 - It was in Wilder, though, so we call that a win.
- Daniel membership application
 - We have a new Application! :))
 - Let's schedule an interview now, since we're all here.
 - He will be coming like right now, so that's pretty cool.
 - He's on his way, right now.
- Technomalogicallymagicallyallyamagimagicalechnomagicalmysticallytechnologicalmys
ticalmagicaltechnologicaltranscendentlysupernaturaltechnologymolyMmmmbeanstechn
ologybrotherprinterneedstodieologystical updates
 - New GPU node.
 - Roundtable may be replaced with new things.
 - Maybe in a fridge.
 - Lots of tech things will be moving around, to make the lab (And all of CIF's services "Ever Better"). Meliora, as the kids say.
- :)
