 - Jeorg is actually doing failover DHCP and routing now.
 - We fixed a slight configuration error.
 - We'll work on migrating other stuff on Korvax to Jeorg in the near future.
 - Grej
 - Now has debian on it. It's there if we need it, but like, it'll sit until that point in time. It got put into the second rack.
 - Reminder for people to go to <http://portal.cif.rochester.edu> and click "Sync AD Password" if they want to use the Windows machines!
 - Started working on Documenting things, but it's going at a slow and steady pace.
 - There is *so much* to do, but it WILL all be done. I will not repeat the mistakes of the past.
 - Recent Alumni were having fun in the lab, looking at all the shenaniganry, and fixes we've been doing lately.
 - 'Twas fun talking to them, showing them things.
 - The Linux/UNIX client machines have been going through changes as of late.
