

# Computer Interest Floor

Board Meeting!  
March 1st, 2026  
Anderson Tower, Floor 3.

---

- Attendance
  - Sam
  - Ehren
  - Leo
  - Matt
  - Hat Jacob
  - Tim
  - Ji Ling
- Past events
  - Open Lab
    - Had record high attendance!
      - Namely 9 People!
      - Seems like people are having just a fun time hanging out in the lab!
        - As a side note, this makes me happy :) -JG
  - SIH Tea Party
    - Went very well!
      - Not really new people per se, but it did have very high attendance.
        - The Douglass community kitchen was completely full!
      - It was really nice to mingle with all the other SIHs and whatnot.
      - We have teabags for floor now! This is good.
- Upcoming Events
  - Tech Seminar (Help Me, please)
    - In a place that has hopefully been reserved
      - :(
    - This is fine, we will reschedule it to a different time.
      - Namely, Thursday, March 26th at 8 PM in Douglass 407
  - Formal Game Night
    - Ehren has been talking with Alumni Relations about sending an E-Mail. They are sending it March 19th... 7 weeks after he started the process.
      - The E-Mail will come out, we can pray, at least.
    - Everything for Formal Game night is set-in-stone.
    - After Break, we will talk about ordering food, but the general consensus is to do exactly what we did last year
    - We should invite Ryan to Formal Game Night.
    - It's basically all set-in-stone. All good to go :)
  - (C)IFnic

- Other SIHs are still game to turn it into IFnic!
    - Basically, the general idea is to have a giant picnic! Pretty cool!
      - Perhaps having it in Genesee valley park, though details will be figured out on the 20th.
- Technomologicallymagicallyallyamagicaltechnological updates
  - The lab has... gotten a lot of updates recently!
    - Korvax has effectively replaced 3 servers!
      - Namely, Citadel, Websharp, and Theseus.
      - It is actively doing the job of all three right now.
    - We also have new rugs, and have done a lot of cleaning.
    - We also took out all of the old rack, made a bunch of ethernet cables, then put everything back, with much cable management!
  - Pretty cool, if I do say so myself.
- New Members!
  - We have two new members, both of whom want to live on floor!
  - We still need new people, for sure, but we really like the new people :)
- Dues Updates?
  - No on-floor members have not paid their dues.
  - 1 2 3 4 5 6 7
    - 7 people still need to pay, 1 of which is on its way actively.
  - Matt will drop off dues on March 20th, during a meeting with Ryan.
- New Ideas for future events?!?!?!?!
  - CIF Project Showcase
  - CIF Question Hour
  - CIF TeaTime
  - Freshmen Social?
  - Minecraft VR
  - Archipelago.
    - April 4th, at 8 PM until late.
      - If this goes long, we'll make it into multiple chapters!
- CIF Advertisement progress
  - It do be going.
  - Ehren has been going to classes.
    - He will be going to ECE 114 tomorrow.
- Elections!
  - They are happening today!
  - Junior tech has not been nominated yet, everything else has.
    - This position will be filled tonight, even if it kills me, or if it kills Sam... or some random freshman.
- Collabs
  - Drama House
    - Ehren and I walked over to Drama house and talked with them, and they're still really interested.
    - We're basically waiting to decide a day.

- We'll provide all the tech, etc.
  - Sig Ep
    - No more archipelago :(
      - Basically, due to concerns of length and attendance.
    - So, they want to transition the meeting into more of a LAN party-style thing.
      - Modern Warfare 2?
      - COD?
    - March 25th, perhaps? They want to do it on the weekday.
    - Ehren will keep up with Sig Ep on this front.
- Donation updates
  - Alumni -> School -> Reslife -> Resident's Fund, earmarked for us.
  - Basically, donations to us don't go into our account, so any purchases have to be made FROM Ryan, and MUST be done online.
  - This is, obviously... less than ideal for obvious reasons.
    - Namely, we don't purchase things online! We purchase things in-person.
  - Ehren met with Ryan to discuss a middle ground.
    - If they can write us a reimbursement check, that would... work, but would not be ideal
  - Ehren talked with MIF.
    - They operate primarily through donations.
    - The alumni advancement office has an account specifically for MIF.
      - Apparently, this is not a difficult process to pursue, all things considered.
    - In other words, MIF's donations operate entirely outside of reslife.
    - Ehren will be pursuing this path, since it seems much better for us than the other way.
  - We have "definitely" gotten \$200 dollars
    - This is pretty cool, and we will be using them for stuff, yet to be decided.

- Floor Announcements
  - We're still doing improvements to the hardware in the lab, and, indeed, to the lab itself.
    - Most of it is done, but feel free to stop by if you want to give moral support, or just general support!
  - Housing Meeting is March 19th. (Which is a Thursday)
    - If you want housing, you should show up.
    - If you just want entertainment, you should show up.
  - We're going to be restarting the CIF Minecraft server over this coming spring break!
    - If you have any input of what types of mods you would like to see in use, please put it in the #minecraft discord channel
      - Alternatively, you can talk to me or Sam after the meeting. (We're both right here, after all!)
    - As a consequence of this restart, we're going to have a ceremonious restart event on Friday, March 6th, both in-person (Lab) and virtual, of course! Feel free to stop on by! :)
  - Elections are like... now :)
  -
