

Computer Interest Floor

Board Meeting!
April 12th, 2026
Anderson Tower, Floor 3.

- Attendance
 - Tim
 - Jacob
 - Leo
 - Sam
 - Matt
 - Ehren
 - Eugene
 - Ji ling
 - Stephen
- Past Events
 - Open Lab
 - Chill time. People seemed to like it. :)
 - Maul: Shadow Lord Showing
 - It happened. 2 people came, one more wants to come next time.
 - The people who went liked the show a lot, so that's cool.
 - We think that the reason it isn't well attended was the time, but that's to be expected.
 - Board Game Night
 - It went hard.
 - There was a normal amount of people, lots of food.
 - Things kind of devolved quickly, which is fun! :)
 - It evolved into a Video Game night, but alas.
 - Mmm CIF MunchFest! :)
- Upcoming Events
 - Open Lab
 - It will happen
 - Formal Game Night
 - It's this Saturday
 - It should be all set to go, with the exception of the Food (Which will be discussed later).
 - A number of Alumni are planning on showing up, which is always cool and fun and awesome.
 - Ryan may also show up, which is cool.
 - IFnic
 - There is a non-trivial chance that it will be held inside, due to rain and whatnot.

- Do we want to bring FGN leftovers?
 - Sure. Might as well, I guess.
 - We'll also be able to bring some stuff from Hillside.
 - There will be a presidents' meeting to determine more of the specifics later.
 - Maul: Shadow Lord Showing
 - It do be happening.
 - Smores Night
 - We need to do one more Smore's Night before the end of the semester.
 - It will be the Senior Night.
 - May 1st is a good time to do it, methinks.
 - Ye, May 1st, it is.
 - Matt Can't show up until like 9, but I think we'll start the Smores night at 8 PM.
 - Ye. Matt Can show up late. :(
 - Collabs
 - DH (There's actually news this time!)
 - It looks like it'll be the weekend of the 25th.
 - Ehren is messaging them AS WE SPEAK.
 - They got back, 25th from 3 -5 PM, with setup starting at 2 PM.
 - They are still interested in doing a Mario Kart thing out by Drama House.
 - Bring the Secondary CRT, Wii, GameCube, etc.
 - Sig Ep :(
 - They keep ghosting us :(
- Technomalogicallymagicallyallyamagimagicalltechnolomagicallmysticallytechnologicalmys
ticalmagicaltechmologicaltranscendentlysupernaturaltechnologymoly updates
 - The general state of CIF server Hardware
 - It's better! :)
 - We actually have more servers than we really know what to do with, which is fun.
 - Jeorg
 - Meant to be put into as a high availability tie to Korvax, pretty much in its entirety. (Including Routing, DHCP, and all the misc python scripts).
 - Felt this was necessary considering how important Korvax is to our infrastructure (Being that Roundtable, the Lab Machines, the Vintage Lab Machines, and the MacStack all depend on Korvax's operation).
 - I may also put openVAS on it, but I'm not fully sure yet.
 - Grej
 - Not *really* sure what to do with it, which is probably a good situation to have. It will probably become a "temporary" backup server whilst we wait

for the ECM/IT server we are definitely going to get at some point in the future.

- DNS
 - We now have 7 DNS zones,
 - cif.rochester.edu
 - Reverse for 220
 - Reverse for 167
 - Reverse for Internal 1
 - Reverse for Internal 2
 - Reverse for Internal 3
 - Reverse for Internal 4
 - Please make sure you're adding things into the right places :)
- MacStack (CIFAI V2)
 - We figured out a way to run an LLM on a series of Mac Minis via MPI
 - It runs **very** hot, but it does work.
 - **almost** hot enough to cook an egg.
 - We'll try again sometime soon.
 - The shenaniganry of CIF never ceases to amaze me. :)
- Password portal
 - <http://portal.cif.rochester.edu>
 - It works, AND has a way to reset your password without a tech director needing to be pestered. (This is a huge quality of life improvement). No longer will I need to bug Ehren 15 times to change my password because I forgot it.
 - Also, thank you Ehren for fixing "my" wonderful python.
 - As a side note, it kind of deprecated the need for the nextcloud instance. We can keep it around, since it has a bunch of nice features, but it's not strictly needed anymore.
- Documentation Night :)
 - Before I die (Go to grad school, and probably before the summer), Us of the CIF tech team need to sit down and just document things. There is a lot to document still, but it WILL be done. We will rectify the mistakes of CIF past and actually document everything we've done this past year.
- I need to update todo :(
- E4E Presentation
 - The presentation is tomorrow at 3 PM in Harper Lounge
 - Ehren has to go, but no one else does.
 - If you want to go, please look professional!
 - We get graded on it! So like... it actually matters.
 - Turns out we've done a lot this year!
 - There is a presentation! (It looks very good)
- Nauticock
 - When are we closing nominations, and when are we voting on it?

- Closing nominations 19th of April, then we'll open up voting soon thereafter
- Orientation/Mel Weekend
 - Are we interested in doing something for any of these? If so, I believe the forms close on the 15th if I'm not mistaken.
 - For Orientation,
 - Perhaps having a large-scale bring-your-own laptop lets play minecraft together, could be a fun and cool idea.
- FGN food
 - Let's talk
 - The food has been sent over to Ryan, he has been told of when he has to order it by, and for. The University of Rochester is tax exempt, so :)
 - The listed price *may* include delivery.
 - We voted, it was unanimous in favor of purchasing around 410 of food.
- Drive cleanup
 - The google drive is a wee bit of a mess. We could clean it up in summer, I guess.
- Talking to other CS groups, and building connections between them
 - Video Game Dev Club, Google Student Developer Club, WicMic, CSUG, Baja, Robotic, Cubesat
 - It would basically be a regularly scheduled meeting between all of these groups, to talk, make connections etc.
 - Very much seems like a next semester problem.
- The Wasabi Peas
 - Jacob ~~brought~~ left them.
